Package, haul; schools provided inventory ahead for price estimate; prepare all shipping papers; can do inventory for them (charge for time), or pack whatever they have and give them an inventory of that.

Suggestions for cost reduction

What will take

Milk runs save mobilization costs; pack to a central pickup area; schedule in conjunction with other customers. Scott Rogers (was at MSU, now state insurance) - he has assisted with labor; somebody who has training as hazardous waste technician (40 hours) can help with actual packing and loading to keep costs down. Westby \$2-3000. Whitefish - \$10,000 for HW and \$4,000 for radioactive materials. Adds to labor costs if spread out all over school grounds. Cost can be reduced if school is flexible about timeline for pickup.

Accept everything (except asbestos with restrictions). If chemicals are unknown, will take samples to analyze and figure out how to handle.
